Tadiwanashe Joshua Mabharani

SOFTWARE DEVELOPER

Harare, Zimbabwe | Big21josh@gmail.com
Portfolio: tadiwanashejoshuamabharani.onrender.com
GitHub: github.com/big21josh | LinkedIn

PROFILE

Harare-based software developer currently studying Software Engineering at Uncommon.org. Practical project experience with responsive interfaces, backend services, authentication, databases, and deployment. Combines JavaScript and Python development with product design, coding instruction, and client-facing technical support.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, HTML, CSS

Frontend: React, Next.js, Tailwind CSS, Bootstrap, responsive web design

Backend and data: Node.js, Django, SQLite, PostgreSQL, Supabase, Firebase Authentication, Firestore, Cloudinary

Tools and delivery: Git, GitHub, npm, Vite, ESLint, Prettier, Vercel, Render

Interactive experiences: Three.js/WebGL, GSAP; UI/UX design and troubleshooting

SELECTED PROJECTS

Shalom Chigama Portfolio | Full-stack web application

JavaScript, Node.js, Firebase, Firestore, Cloudinary, WebGL | 2026

- Developed a responsive artwork catalogue with an interactive WebGL gallery and an authenticated content-management studio.
- Implemented owner/editor access, Firestore project data, and a Node.js API for role verification and signed Cloudinary uploads.
- Live website

Muwoni Task Manager | Task management application

Python, Django, SQLite, Bootstrap | 2026

- Built task creation, editing, and deletion using Django models and views, with calendar scheduling and a responsive interface.
- Deployed the application on Render.
- GitHub repository | Live website

Personal Developer Portfolio | Interactive project showcase

React, Three.js/WebGL, GSAP, Lenis | 2026

- Adapted a Visuvate design reference to showcase personal projects with actual screenshots, searchable case studies, and certificates.
- Refined section-aware navigation, light/dark themes, modal scrolling, metadata, and reduced-motion support.

Tadiwanashe Joshua Mabharani

Software Developer | Experience, education and certifications

PROFESSIONAL EXPERIENCE

Youth Coding Instructor | Uncommon.org Youth Coding

January 2026 - Present

- Teach coding fundamentals and mentor young learners through programming, problem-solving, and product design lessons.
- Develop beginner-friendly learning content and support youth engagement.

Business Management Systems Specialist | Classic Technology

2023 - 2025

- Provided business management and point-of-sale software, including installation, client onboarding, and ongoing technical support.
- Supported retail technology integration and business workflows.

CCTV Installation Technician | Muwoni Technologies

2023 - 2025

- Installed and maintained CCTV, networking, and security hardware.
- Troubleshot systems and trained clients on security-system usage.

EDUCATION

Software Engineering | Uncommon.org

January 2026 - Present

- Ongoing software engineering training alongside practical web development projects.

Secondary School | Rujeko High School

2016 - 2019

SELECTED CERTIFICATIONS

Introduction to Software Engineering | IBM / Coursera | August 2026

React Basics | Meta / Coursera | July 2026

Crash Course on Python | Google / Coursera | July 2026

Inbound Certified | HubSpot | May 2026

Product Designer | Uxcel | March 2026

Additional Uxcel learning: UX Design Foundations, Advanced UI Components, Core UI Components, Typography, Design Terminology, Leadership Mastery, and AI Prompts Foundations.
